RESEARCH INTERESTS

- ◇ Verification, validation and uncertainty quantification of earth system models and their constituents
- ◇ Developing cross-disciplinary tools to facilitate collaboration, sharing, and reproducibility
- ◇ Applying computational physics methods to novel and unique problems
- ◇ Investigating the link between climate history and ice crystalline fabric
- ◇ Glacier dynamics and the effects of anisotropic ice on bulk properties

PROFESSIONAL EXPERIENCE

Oak Ridge National Laboratory, Oak Ridge, Tennessee, USA

Computational Scientist in Glaciology

Climate Change Science Institute

December 2016 – present

Perform research tasks using Earth System Models (ESMs; e.g., DOE's E3SM, CESM) and ice sheet models (e.g., MPAS-LI, BISICLES, PISM, CISM); coordinate the verification and validation of E3SM, MPAS-LI, and BISICLES simulations; development of the Land Ice Verification and Validation toolkit (LIVVkit), a python-based toolkit for robust evaluation of ice-sheet models; and develop an extended V&V evaluation tool (EVE) for climate reproducibility testing of ESMs.

Oak Ridge National Laboratory, Oak Ridge, Tennessee, USA

Postdoctoral Research Associate

Climate Change Science Institute

January 2015 – November 2016

Perform research tasks using the Community Ice Sheet Model (CISM) and coordinate the development of the Land Ice Verification and Validation toolkit (LIVVkit) — a python-based toolkit for robust evaluation of ice-sheet models.

Advisor: Dr. Katherine J. Evans

EDUCATION

University of Alaska Fairbanks, Fairbanks, Alaska, USA

Department of Physics

Ph.D., 2015, Dissertation Topic:

“Linking climate history and ice crystalline fabric evolution in polar ice sheets.”

Advisor: Dr. Erin C. Pettit

Western Washington University, Bellingham, Washington, USA

Department of Physics

B.S., Physics, June, 2008

Minors: Astronomy, The Study of Religion

SOFTWARE

Lead developer of the Land Ice Verification and Validation toolkit (LIVVkit); a python-based, extensible verification and validation suite for land-ice models. Latest public, open-source release of LIVVkit, version 2.1.0, was on October 25, 2017. <https://github.com/LIVVkit/LIVVkit>

Developer of the ISMIP6 Atlas submission validation tool; an extension to LIVVkit which checks submissions to ISMIP6 experiments for correct file names, paths, metadata, etc. and produces a large variety of diagnostic plots. <https://github.com/LIVVkit/Atlas>

Developer on DOE's E3SM ecosystem projects

◇ MPAS-Analysis: Analysis for simulations produced with Model for Prediction Across Scales (MPAS) components and DOE's E3SM. <https://github.com/MPAS-Dev/MOAS-Analysis>

◇ A-Prime: Python based scripts to generate coupled priority metrics for DOE's E3SM. <https://github.com/ACME-Climate/a-prime>

◇ EVE: Extended verification and validation for Earth system models, public release forthcoming.

Contributor to open-source software projects

◇ PR19 and PR27 to [sphinx-js](#) leading to release of (bugfix) v2.0.1 and contributing to v2.2.

Past: Developer and integrator for the joint DOE/NSF Community Ice Sheet Model (CISM); a next-generation ice sheet model used for predicting ice sheet evolution and sea level rise in a changing climate. Last public, open-source release of CISM was version 2.0.5 on was August 28, 2015.

ALLOCATION PROPOSALS

Energy Research Computing Allocations Process (ERCAP) for NERSC (2016)

Co-I, accepted, *Predicting Ice Sheet and Climate Evolution at Extreme Scales*, 10M hours on Edison

OLCF Directors Discretion Allocation (2015)

Co-I, accepted, *Earth System Modeling Collaborative*, 10M hours on Titan

AWARDS

2016 CCSI Professional Development Award, \$100,000

Co-I: “Understanding the links between neighbourhood level human activity and global climate change by developing an integrative methodology using data analytics, agent-based modelling and earth system modelling.” Project PI: Dr. Melissa R. Allen.

Climate Change Science Institute, Oak Ridge National Laboratory

2013–2014 Thesis Completion Fellowship, \$15,000 + tuition

University of Alaska Fairbanks Graduate School

2011–2012 CASE GK-12 Fellow, \$45,000

NSF Graduate STEM Fellow in K-12 Education, Changing Alaska Science Education

SYNERGISTIC ACTIVITIES

2016–present Referee for the Australian Antarctic Division, the Geophysical Journal International, and the Journal of Mountain Science

2015–present Currently participating in the Ice Sheet Model Intercomparison Project 6 (ISMIP6)

2015–present Conducting multiple experiments for the Initialization of Models Intercomparison Project (initMIP)

2015–present Outreach talks, entitled “Using computational science to understand Earth’s climate”

◇ UAH Joint Space Weather Summer Camp, June 30, 2017

◇ APSU Governor’s School, June 16, 2017; June 17, 2016; and June 12, 2015

◇ McCalie School (8th grade), May 10, 2017

◇ University of Louisville’s Society of Physics Students, March 15, 2017

◇ White House High, April 7, 2016

◇ Lipscomb Academy, Oct. 1, 2015

TEACHING EXPERIENCE

Oak Ridge Institute for Continued Learning at Roane State Community College, Oak Ridge, Tennessee, USA

Co-lecturer with Dr. Melissa R. Allen (ORNL)

Climate Change Science

June 2016

We presented four lectures, one and a quarter hours in length, on the topics: 1) global warming and the carbon cycle, 2) indicators of climate change, 3) impacts of climate change on human life and 4) global and regional climate modeling and uncertainty.

University of Alaska Fairbanks, Fairbanks, Alaska, USA

Graduate Teaching Assistant

Geology & Geophysics Department

August 2014 – December 2014

I taught the computational portion of the graduate level geophysics course Foundations of Geophysics and was responsible for lectures, homework assignments, and grades. Further duties included holding weekly office hours.

- ◇ GEOS 631/431 – Foundations of Geophysics, Fall 2014

Guest Lecturer

GEOS 631/431 — Foundations of Geophysics (Oct. 25 and Oct. 30, 2012): I gave two lectures, one and a half hours in length, on general conservation laws, conservation of energy, and heat transfer. The first lecture started with the general form of the conservation laws, derived the conservation of momentum equation the students were familiar with, and then discussed the definition and forms of energy. The lecture concluded with a discussion on the first law of thermodynamics as well as a derivation of the conservation of energy equation. The second lecture discussed Fourier's law and solved practical heat flow problems; some of which were taken from Chapter 4 of Turcotte and Schubert's Geodynamics textbook.

Guest Lecturer

GEOS 636/436 — Beyond the Mouse: Computer Programming and Automation for Geosciences (Sept. 11 and Nov. 15, 2012): The September lecture was 1 hour in length and focused on an introduction to variables and data types. We discussed what a computer is, how a computer thinks, what a program is, and what a programming language is. The students were then taught how to create variables and store different types of data. The November lecture was a demonstration of live programming and was 2 hours in length. I demonstrated how to use common command line tools, a scripting language, and good file structure to create a manuscript preparation work-flow. I developed scripts to help create a L^AT_EX document and introduced tools such as a distributed version control system to keep track of changes and share work with collaborators.

Graduate Teaching Assistant

Geology & Geophysics Department

August 2012 – December 2012

I taught the computational portion of graduate level geophysics courses and was responsible for lectures, homework assignments, and grades. Further duties included holding weekly office hours.

- ◇ GEOS 631/431 — Foundations of Geophysics, Fall 2012
- ◇ GEOS 636/436 — Beyond the Mouse: Computer Programming and Automation for Geosciences, Fall 2012

NSF GK-12 Fellow

Denali Elementary School

May 2011 – May 2012

I taught 4 science lessons a week in two first grade classrooms of 30 students (10 contact hours per week). We covered a variety of subjects, including: the scientific method, the five senses, plants, birds of prey, migratory birds, caribou, weather, glaciers, heat transfer, food science, rockets, pressure-volume-temperature, volcanoes and how to design a testable question. I primarily designed the lesson plans, homework, and experiments for the students. At the end of the year, the classes worked on a joint science fair project in which the students designed and conducted the entire experiment. The classes won a first place ribbon and a \$50.00 prize for *Exceptional Women in Science* at the Fairbanks Northstar Borough School District Science Fair.

Graduate Teaching Assistant

Physics Department

August 2008 – May 2009

I taught the laboratory portion of introductory physics courses and was responsible for lectures, homework assignments, and grades. Further duties included holding weekly office hours and staffing the homework help office.

- ◇ PHYS 103 – College Physics I, Fall 2008, 2 sections
- ◇ PHYS 104 – College Physics II, Spring 2009
- ◇ PHYS 115 – Physical Science I, Spring 2009

Western Washington University, Bellingham, Washington, USA

Undergraduate Teaching Assistant

September 2006 – June 2008

I taught the laboratory portion of the introductory physics courses and was responsible for lectures, homework assignments and grades.

- ◇ PHYS 131 — Physics with Calculus I Lab, Fall 2006, 2007
- ◇ PHYS 132 — Physics with Calculus II Lab, Winter 2007, 2008
- ◇ PHYS 133 — Electricity and Magnetism Lab, Spring 2007, 2008

INVITED TALKS

Kennedy, J.H., K.J. Evans, A.R. Bennett, P. Worley, S. Price, M. Hoffman
Evaluating the performance of ice sheet models using LIVVkit
Minisymposium on numerical methods towards next generation ice sheet models
SIAM Conference on Mathematical and Computational Issues in the Geosciences
Erlangen, Germany, Sept. 11, 2017

Kennedy, J.H.
Climate change today: An overview of the science, the observations, and a look toward the future
TENS: The Executive Network of Seattle, Seattle, Washington, January 16, 2017

Kennedy, J.H., M.R. Allen
Climate change overview
League of Women Voters of Oak Ridge, Oak Ridge, Tennessee, February 16, 2016

Kennedy, J.H.
Glacier modeling in < 10 minutes
CCSI Earth System Modeling Workshop, Oak Ridge National Laboratory, June 9, 2015

Kennedy, J.H.
A closer look at the link between climate history and fabric evolution in ice sheets
MicroDice Ice Flow Workshop, Nuuk, Greenland, August 22, 2011

Pettit, E.C., A. Gusmeroli, *J.H. Kennedy*
Exploring the link between climate history and fabric evolution in ice sheets
Laboratoire de Glaciologie et Gophysique de l'Environnement, Grenoble, France, April 12, 2011

Kennedy, J.H.
Climate signal evolution in crystal orientation fabric
Physics Department Colloquium, Western Washington University, Bellingham, WA, October 21, 2010

CONFERENCE
PRESENTATIONS
(LAST 5 YRS)

Kennedy, J.H., et al.
Using the LIVVkit 2.0+ validation infrastructure
22nd Annual CESM Workshop, June 19, 2017

Kennedy, J.H., et al.
Climate reproducibility testing with EVE
ACME all-hands meeting, June 5, 2017

Kennedy, J.H., et al.
PISM-FEvoR: a multi-scale ice flow model incorporating fabric evolution with recrystallization
SIAM Conference on Computational Science and Engineering, MS243, March 2, 2017

Kennedy, J.H., et al.
LIVVkit 2: A robust and extensible python package for ice-sheet model verification and validation
AMS Annual Meeting, Seventh Symposium on Advances in Modeling and Analysis Using Python, January 24, 2017

Kennedy, J.H., et al.
LIVVkit 2: An extensible land ice verification and validation toolkit for comparing observations and models
AGU Fall Meeting, Abstract GC21A-1051, December 13, 2016

Kennedy, J.H., et al.
Full-system evaluation of Earth system models
Advancing X-cutting Ideas for Computational Climate Science, September 12, 2016

Kennedy, J.H., et al.
Building LIVVkit
CCSI Earth System Modeling Workshop, August 16, 2016

Kennedy, J.H., et al.
Developing LIVVkit
Oak Ridge Postdoc Association Research Symposium, August 8, 2016

Kennedy, J.H., et al.
An introduction to LIVVkit 2.0
21st Annual CESM Workshop, June 22, 2016

Kennedy, J.H., et al.
LIVVkit now and into the future: A discussion
Land Ice Working Group Meeting, February 10, 2016

Kennedy, J.H., et al.
Building confidence in the Community Ice Sheet Model (CISM) with LIVVkit, the land-ice validation and verification toolkit
AGU Fall Meeting, Abstract C51C-0741, December 18, 2015

Kennedy, J.H., et al.
LIVV awakens: A toolkit for land ice verification and validation
20th Annual CESM Workshop, June 17, 2015

Kennedy, J.H., et al.
The record may be in the fabric: Preservation of climate history in polar ice sheets
AGU Fall Meeting, Abstract C52B-08, December 13, 2013

Kennedy, J.H., et al.
Evaluating the parameterization of polygonization in a fabric evolution model
IGS Symposium, Poster ID 63A500, June 28, 2012

FIELD WORK **Dome C, East Antarctica.** Deploying a sonic probe down the Dome C ice core borehole and prepping ice core samples. 3 weeks.
 Valdez, AK, USA. Deploying sea temperature moorings. 3 days.
 Yakutat Glacier, AK, USA. Taking GPS measurements, ablation stake measurements, and deploying time laps cameras. 5 days.
 Icy Bay, AK, USA. Deploying hydro-acoustic mooring, taking CDT casts, and hydro-acoustic recordings. 5 days.

AFFILIATIONS APS American Physical Society
 IGS International Glaciological Society
 AGU American Geophysical Union

COMPUTER SKILLS Operating Systems: Unix/Linux, Windows, OSX
 Languages: Python, C/C++, FORTRAN, Bash, L^AT_EX
 Mathematics Packages: MATLAB, Mathematica, Octave
 Data science: netCDF4, HDF5, NCO, NCL, Anaconda, R, Gnuplot
 Web: Apache, PHP, HTML, CSS, Drupal
 Applications: Mendeley, Adobe Creative Suite, Microsoft Office

OTHER SKILLS
AND ACTIVITIES ◇ Wilderness experience including a continuous 700 mile, 33 day, canoe trip down the Yukon River
 ◇ Skilled with soldering, hand and power tools, and simple electrical systems
 ◇ Extensive boat experience: sailing, canoeing, power-boating, etc.
 ◇ Enjoy outdoor recreation: biking, hiking, backpacking, camping, etc.
 ◇ Trained in bear safety
